## PROJECTS

<https://github.com/mstroner20>

- **Transaction Program** – Small program that reads in text files that will display amount of transactions during a given year. Using C# and .NET forms. Created in Visual Studio.
- **Capstone Website** – Program developed on a team of 2 that displays an interface to make transactions along with user verifications. Uses a MySQL database and PHP along with small amounts of JavaScript.

- **Pomodoro Timer Website** – Basic pomodoro productivity timer that was developed using HTML, CSS and JavaScript. Created to become more familiar with JavaScript.
